Go digital career project cohort 3

Presentation of Project 1

Insights from Anaconda Data Science survey in 2022

4th March 2023

Meet Group 4

- Tin Chung Cheung (TC)
- Yiu Ting Leung (Ernest)
- Yiu Tung Wong (Tony)

Agenda

Introduction

Why we chose this topic

What we hoped to discover

Sources & Tools

The sources and tools that we used in this project

Observations & Insights

Illustrate insightful observations by showing colourful charts and concise descriptions

Conclusion

What can we learn from this project?

What should be our next step?

Q & A

Discussion time!

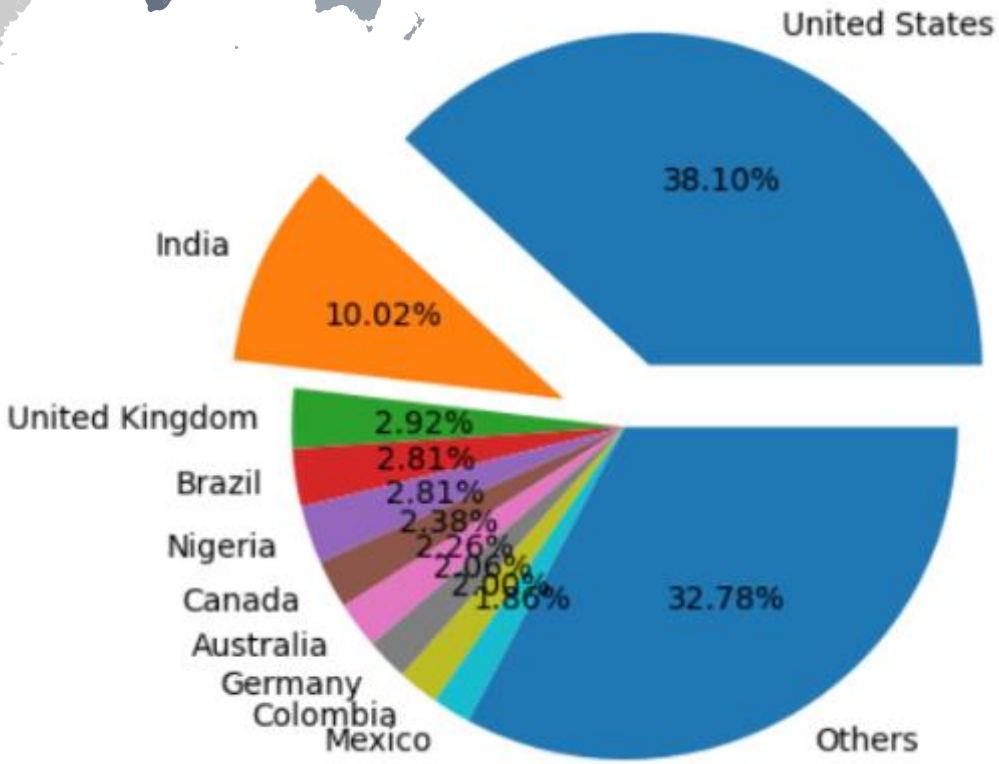
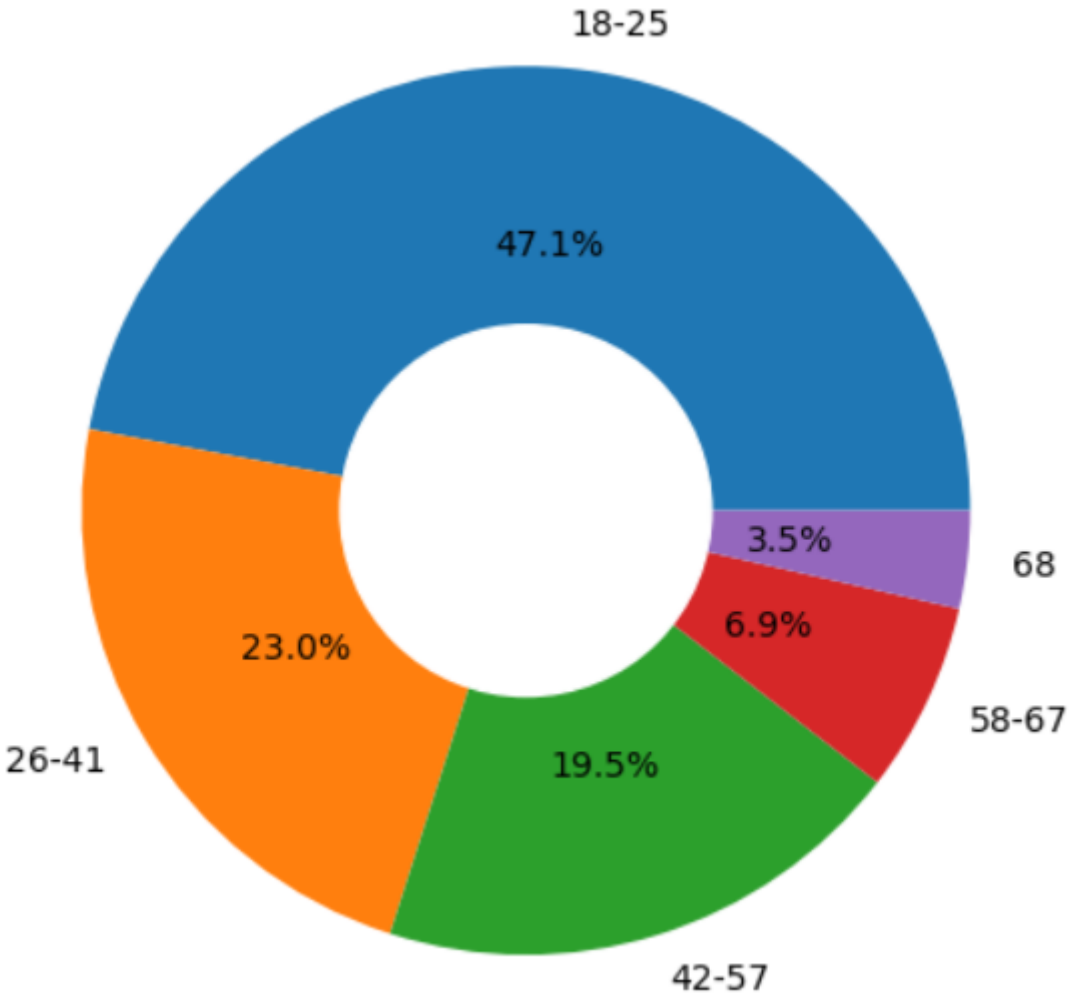
Employees' Backgrounds

Distribution of countries



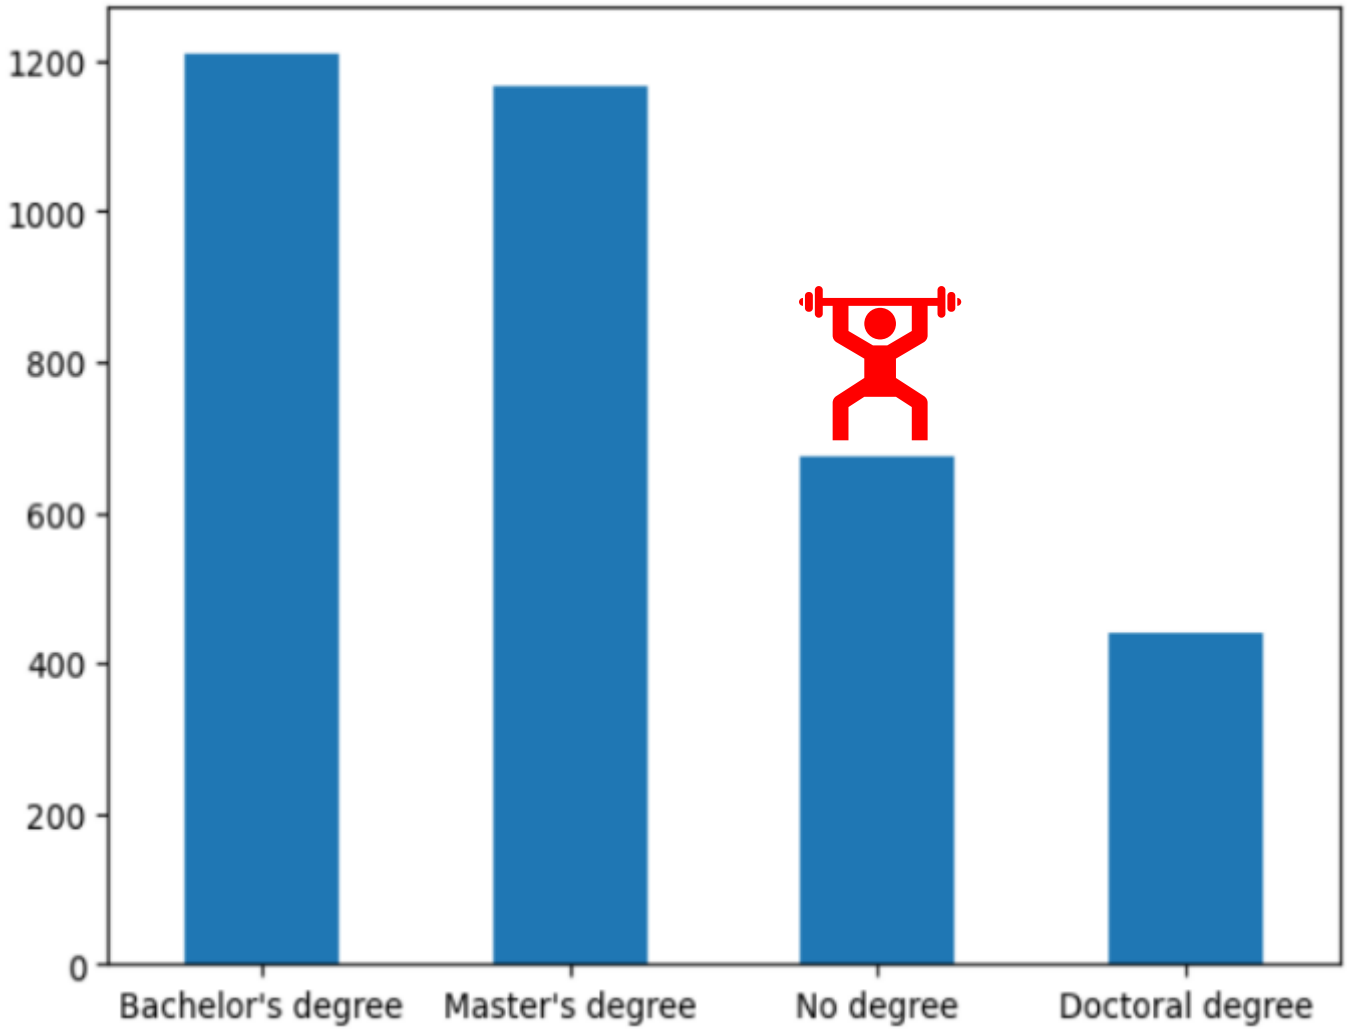
- The US and India alone almost occupy half of the proportion.
- Emerging economies such as Brazil, Nigeria and Mexico have significant percentages.

Age groups



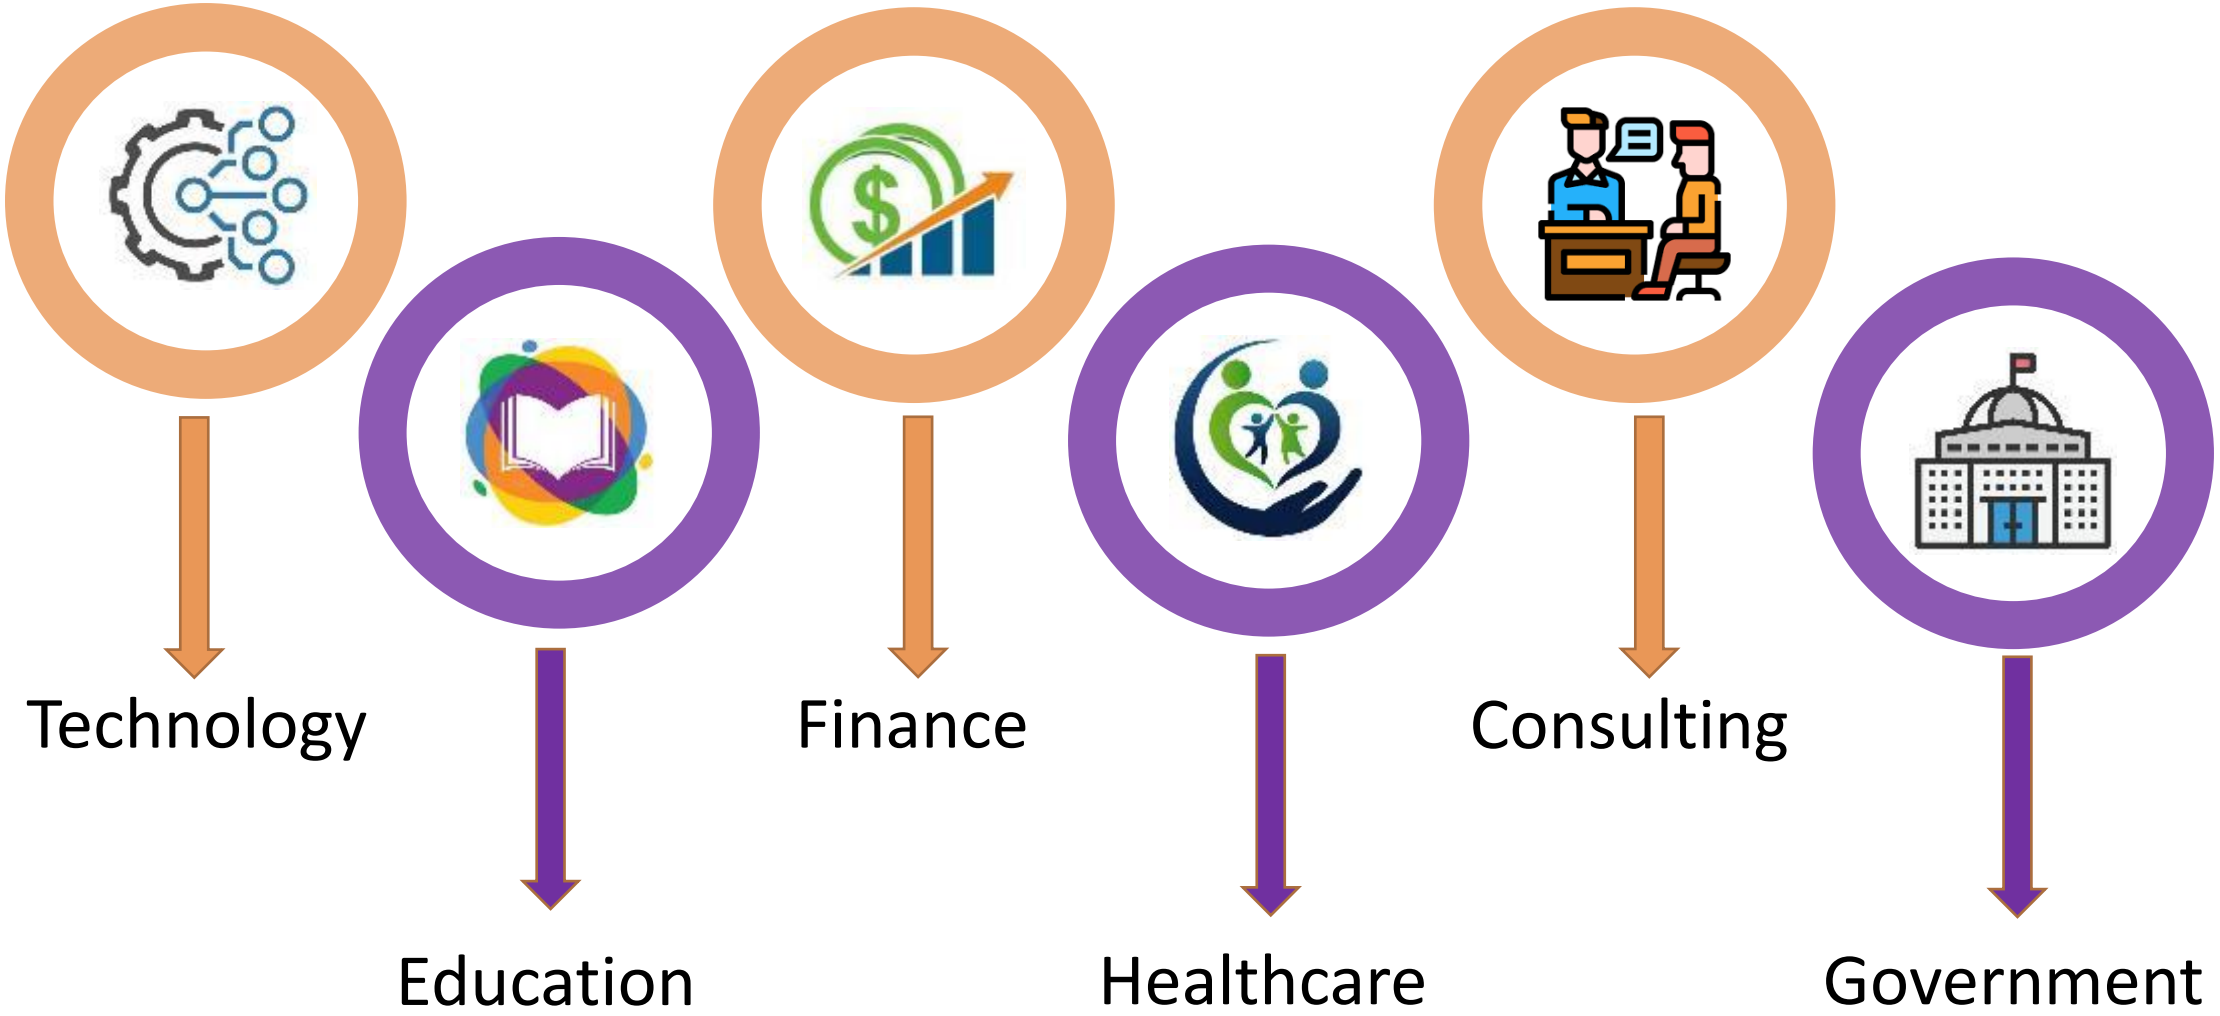
- ‘18-25’ and ‘26-41’ groups contribute 70%.
- Data science is an industry for young adults!

Level of education

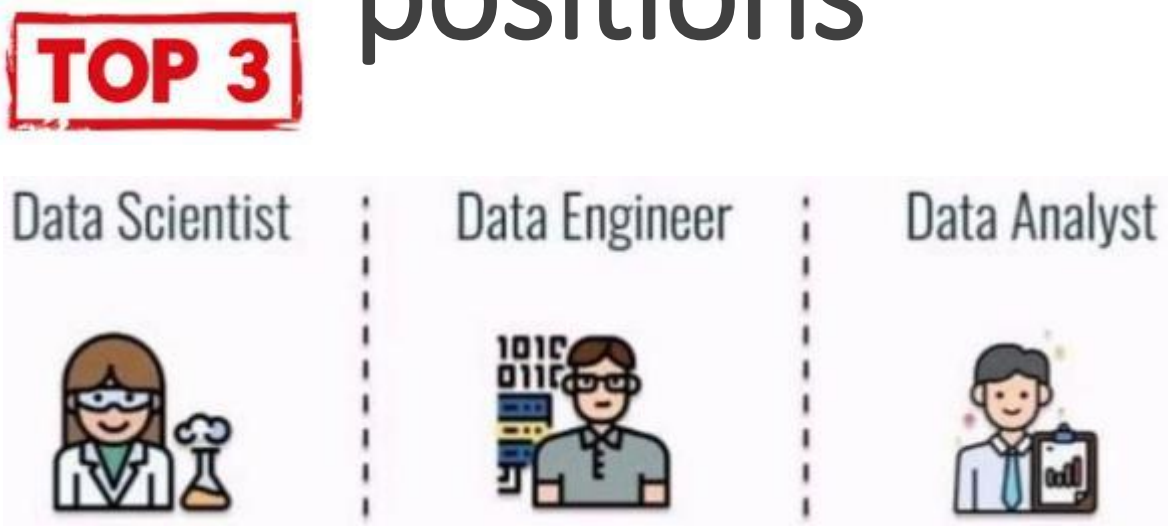


- About 60 % of the employees hold a bachelor or master degree.
- Over 10% are even PhDs.
- Higher education is not essential for data scientists though.

Distribution of industries



Predominant positions

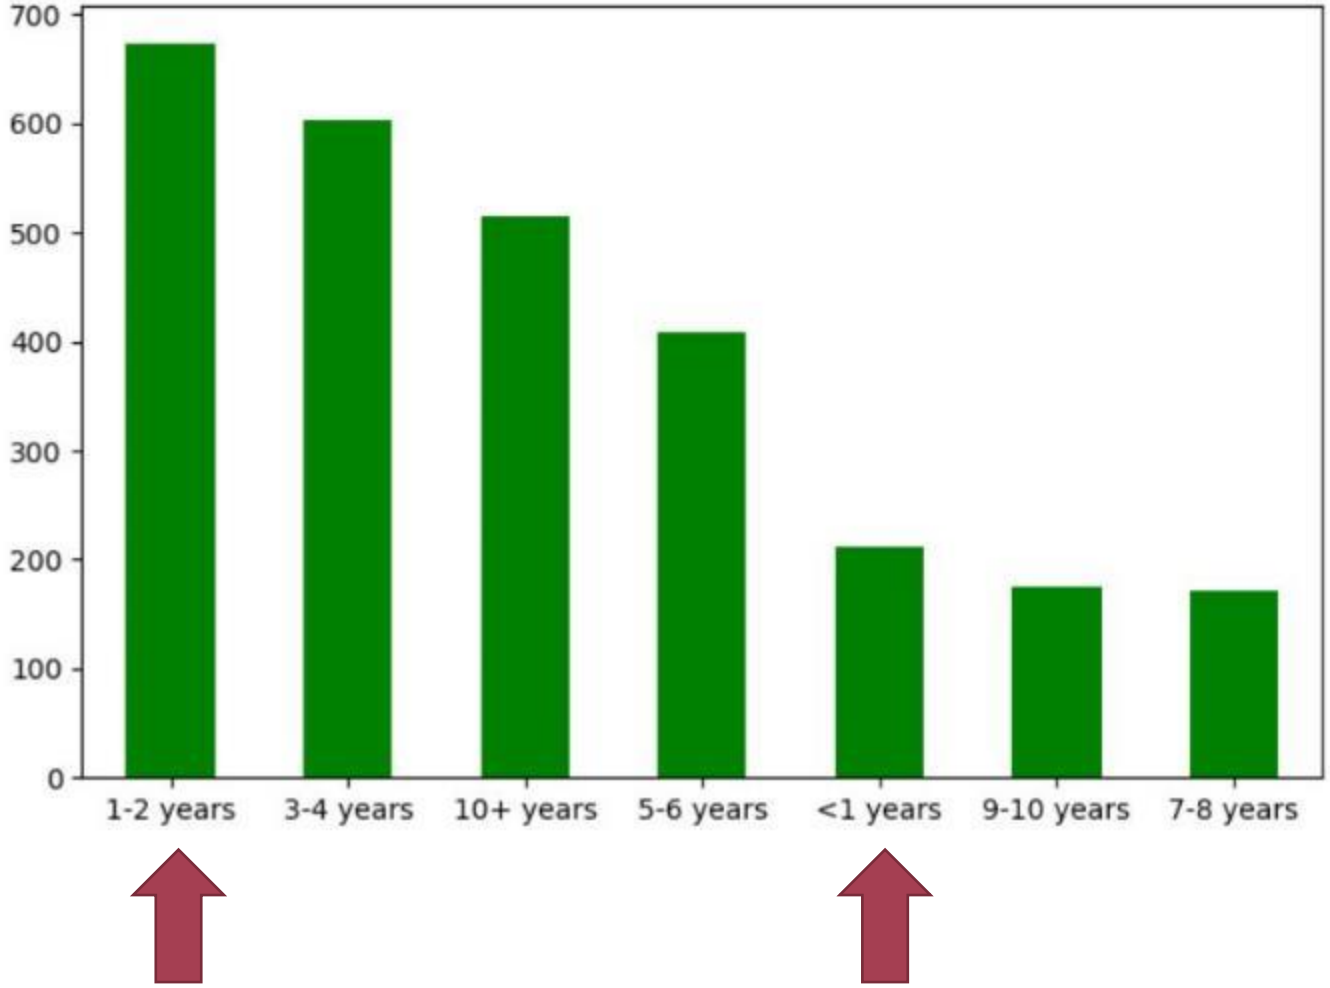


Research Scientist

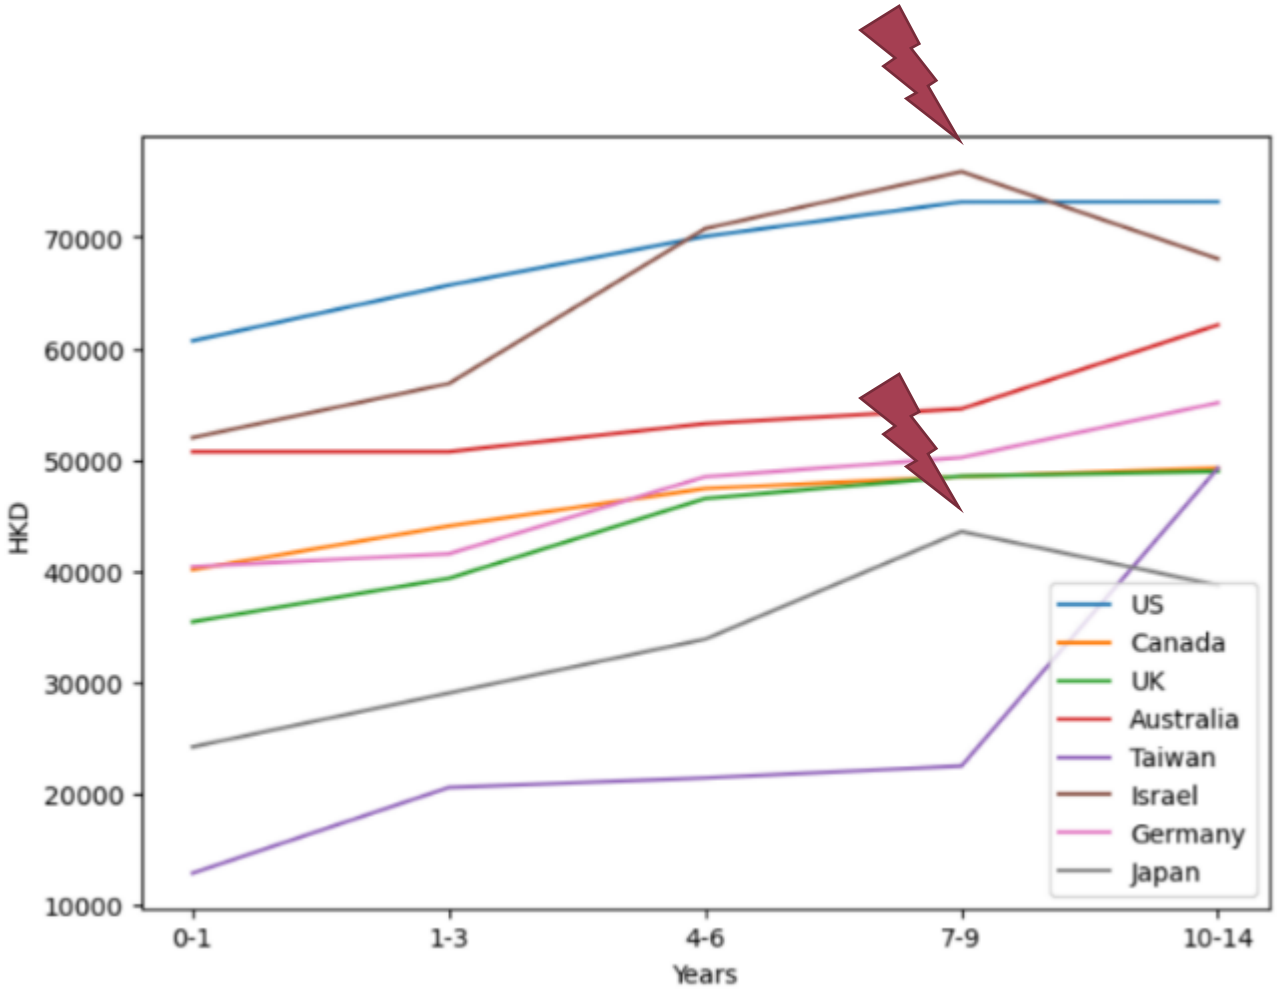
Developer

Working experience

Newbies? No worries!



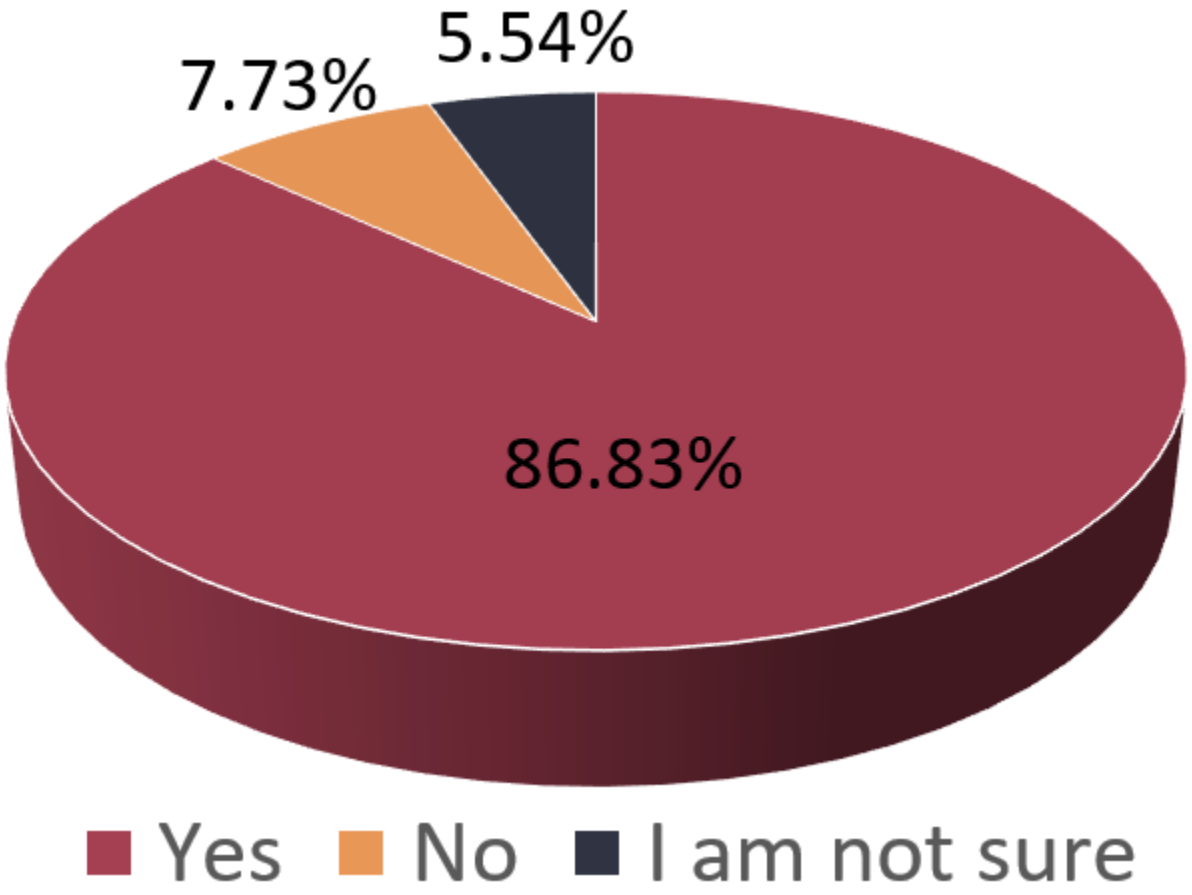
Salaries across the world



- Average salaries are high.
- US, Israel and Australia have the highest starting salaries for beginners.
- Experience ↑ ≠ Salary ↑ ☹

Open-source software

Usage of open-source software



What do they value the most?

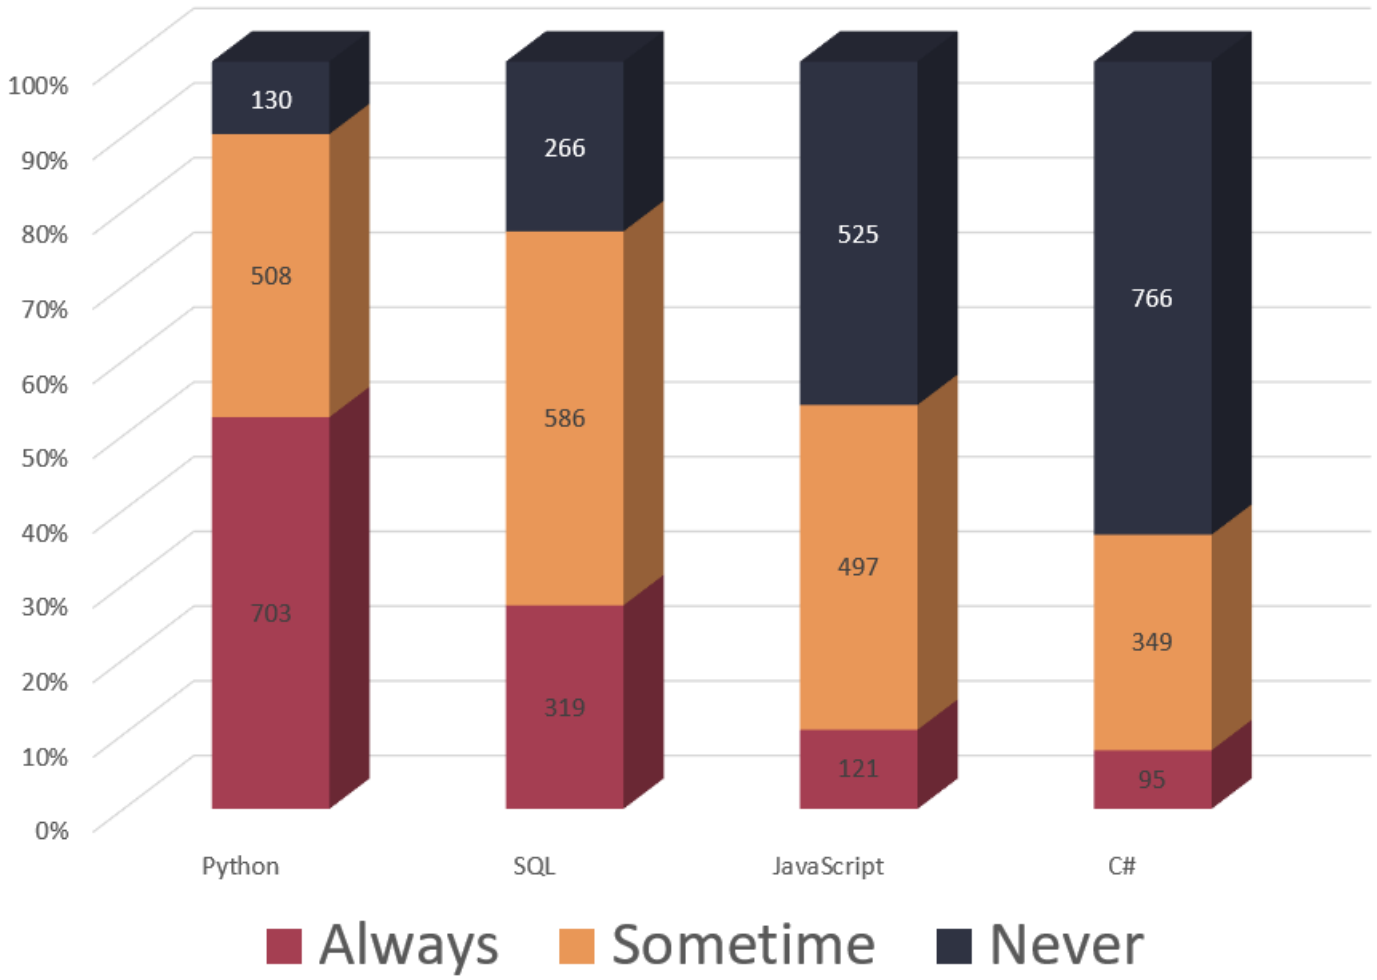
Speed of innovation

Economical option

Usefulness

Software quality

Usage of programming languages



Ideas and experiences on the industry

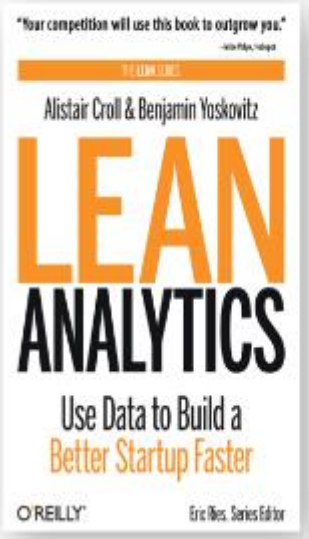
Biggest problems in Data Science

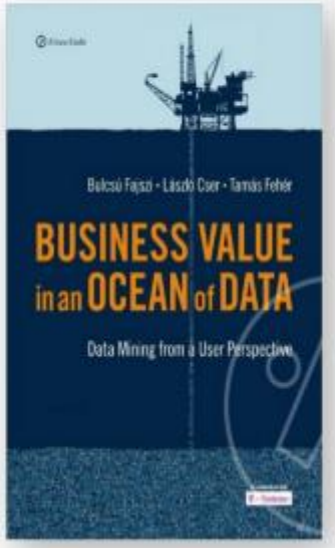
Privacy and
safety concerns

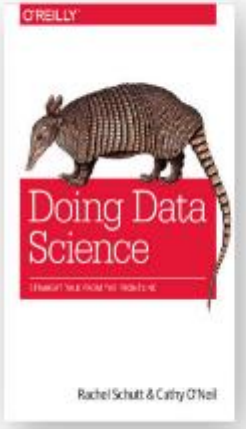
Bias from data
and models

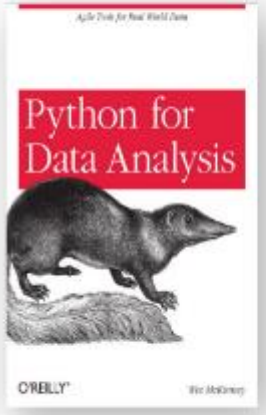
Job reductions
by automations

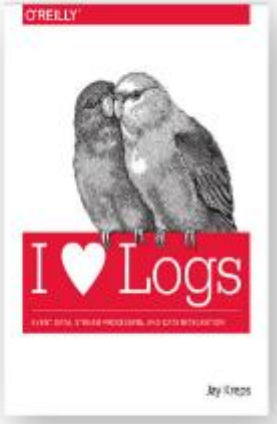
How to learn new tools?











YouTube

香港浸會大學
HONG KONG BAPTIST UNIVERSITY

hahow
好學校

bilibili

codecademy

udemy

coursera

edX

Future expectations

Further innovation in open-source communities

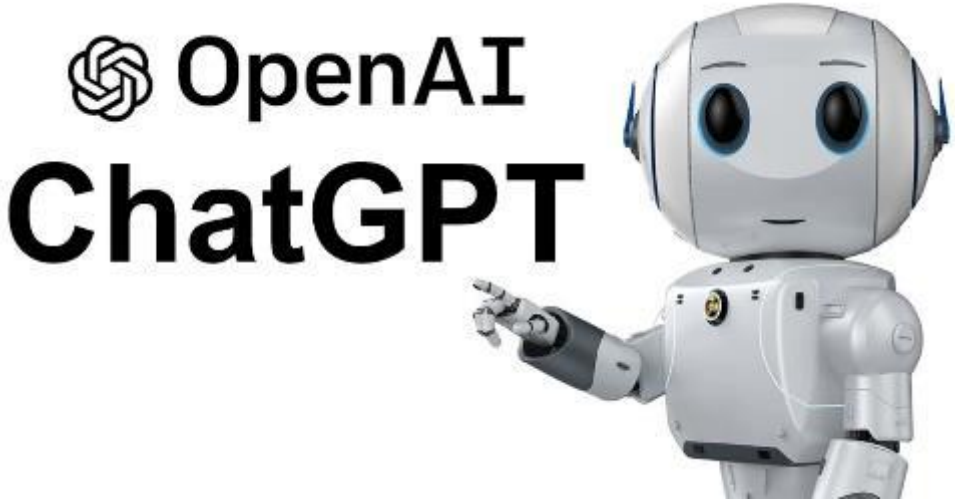
New and optimized models

More resources given in organizations

Conclusion

Challenges

Examples of AI Application in Retail
Inventory Management
Smart Shopping Carts
Customer Loyalty Management
Marketing Campaign Management
Virtual Fitting Rooms and Trial Mirrors



OpenAI
ChatGPT

Insights & Suggestions

Objective facts

Industry prospects

- A potential and prosperous industry for young adults and those who want to emigrate

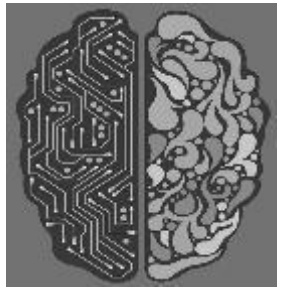
Continuous learning

- Never stop learning
- Excel in Python and SQL

Self-development

Exercise our thinking

- Be creative, innovative and objective



Discover our strengths

- Learn from our peers
- Maximize our advantages and find the best positions

THANK YOU !

Q & A
